**WE MAKE
MINING EASIER.**

ALL YOUR BLASTING NEEDS,
WITH PLATINUM SERVICE.

PLATINUMBLASTING.COM

Running an efficient mine is hard work. So, when it comes to choosing your blasting team, you want a partner who makes your life easier.

And that's where we come in.

You might think all blasting providers are the same. Well, not us. We offer the full suite of capabilities, but with Platinum service you won't get anywhere else.

It's a service so good, you'll know your blasting needs are being taken care of simply by the trail of excellently fragmented rock we leave behind.

CAPABILITIES

Don't pay for things you don't need. With Platinum, you can tailor your package from our full suite of services.

Product import & supply

We manage large volumes of ammonium nitrate (AN) thanks to strong partnerships with multiple top-tier manufacturers. We're also backed by Deepak Fertilisers, one of the world's largest AN manufacturers, and can supply initiating systems from the manufacturer of your choice.

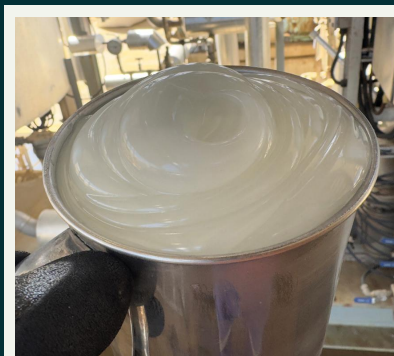

Storage handling & logistics

Our 12,000-tonne AN facility in Bajool and brand-new 4,000-tonne facility in Moranbah are equipped with bagging plants, container-packing capabilities, and 24/7 operations. These security-sensitive facilities are designed to provide safe, efficient, and seamless storage and handling of AN.

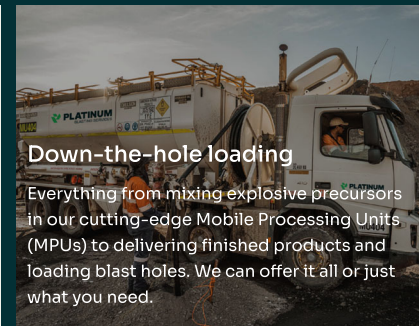

Blast design & technical services

We provide expert assistance with: blast patterns, timing, powder factors, stemming, fragmentation, vibration, overpressures, bench height and width, explosive product development, approvals and licensing.

Emulsion manufacturing

Our in-house Hydra range is produced at our emulsion manufacturing facility in Moranbah, Queensland, providing high-quality solutions for wet, dry and de-watered holes, along with an eco-friendly explosive doping marker. We're also building another facility in Oakajee, Western Australia, that will manufacture green explosives produced from renewable resources.

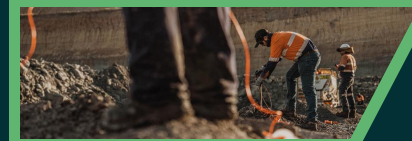

Down-the-hole loading

Everything from mixing explosive precursors in our cutting-edge Mobile Processing Units (MPUs) to delivering finished products and loading blast holes. We can offer it all or just what you need.

Blast control & firing

We can provide any combination of explosive precursor supply, initiating and heavy explosive supply and placement, and tie and fire services.

OUR PLATINUM SERVICE INCLUDES:

A customised experience

We don't do one-size fits-all. We dive deep into your specific needs and create a plan that's uniquely yours. No unnecessary extras, just what you need.

A can-do attitude

We're the 'never say no' crew. Going above and beyond isn't just talk; it's in our DNA. We recruit and develop our team for this cultural fit to ensure your time is respected, and disruptions minimised.

A local advantage

We're proudly Australian, with a flat management structure, meaning you benefit from local insights, quicker response times and a personal touch you won't find anywhere else.

A reliable partner

With decades of experience, we deliver excellently fragmented rock, safely and when you need it.
