

POWERING PRECISION AT SCALE.

MAKE MINING EASIER  WE MAKE MINING EASIER  WE MAKE MINING EASIER  WE MAKE MINING EASIER  WE MAKE MINING EASIER

Large MPUs for high-output blasting in large-scale operations.

The iCAN 4000 system provides real-time blending, flow control, GPS tracking and digital shot reporting – ensuring precision, safety and compliance in every load.

Key Capabilities

- Twin-steer, bogie drive (8x4) Volvo IEE
- Automated on-board blending of ANFO and ANE via iCAN 4000
- Integrated GPS tracking and electronic shot reporting
- Configured for both wet and dry product delivery
- Customised bin designs to optimise performance under varying moisture and loading conditions
- Built to AEISG MPU Code of Practice (Version 4)
- Fully compliant with AS2187 and relevant state explosives transport regulations

Applications

- High-volume quarry and open-cut mining operations
- Production blasts requiring rapid turnaround and precision charging
- Large-scale campaigns demanding consistent density control and performance

Discharge Rates

- ANFO (Auger): 800 kg/min
- HANFO (Auger): 800 kg/min
- Sensitised Wet Product (Pump): 300 kg/min

Specifications

ANE Capacity	7.6-8.5 tonnes
AN Capacity	9.3-10.3 tonnes
Gasser Tanks	120 L and 350 L
Process Fuel Capacity	823-980 L
Water Capacity	860 L
